

Inland Ash Scattering in Singapore

A Guide to the Garden of Peace and Garden of Serenity

OUR INLAND ASH SCATTERING GARDENS

The Garden of Peace (GOP), which opened in May 2021, marked Singapore's first dedicated inland ash scattering facility. The Garden of Serenity (GOS), our second facility, opened in August 2025, to meet growing needs.

The inland ash scattering facilities are designed as open gardens which feature designated lanes with pebble beds for scattering fine cremated ashes. Trees and hedges provide privacy between lanes. Families can gather, view, and take part in the ash scattering process in a peaceful garden setting as their loved ones return to nature.

Important Information for Users

These gardens are maintained through respectful soil management to ensure they remain available for all families.

At both gardens, scattered ashes naturally accumulate within the lanes over time. **When lanes reach capacity, ash soil from both gardens are transferred to a designated location within the GOP (located at Choa Chu Kang Cemetery) to allow for continued use of the lanes.**
