Activity Time

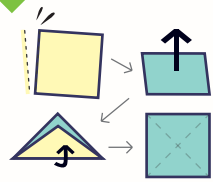

Let's Make a Paper Chatterbox!

Create your own Paper Chatterbox and use it to start conversations with your friends and family. Through this activity, you'll learn more about one another's thoughts and feelings about our cultures and experiences.

How to Fold a Paper Chatterbox

1

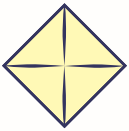

Tear the square paper on page 13. Place it flat with the blank side facing up. Fold it in half diagonally both ways to create an 'X' crease, then unfold.

2

Take each corner and fold each corner towards the middle.

3

Your paper should now be a smaller square with four triangular flaps that meet at the centre.

4

Flip your square over.

5

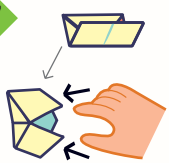

Fold the corners to the centre again.

6

You should now have an even smaller square with visible folded sections.

7

Fold your square in half to make a rectangle, then unfold. Fold it again in the other direction to create another crease. Slide your thumbs and index fingers under the four outer flaps.

8

Pinch your fingers together and gently push towards the centre. Work the creases to shape your Paper Chatterbox and it's ready for use!

How to play:

1. Find a friend or family member and ask them to pick a fruit.
2. Move the flaps in and out and side to side as you spell out the fruit they have chosen.
3. Stop on the last letter with the Paper Chatterbox opened to reveal the numbers. Ask your friend or family member to pick a number. Like in Step 2, move the flaps in and out and side to side and count. Stop when you reach your friend's or family member's number.
4. Ask your friend or family member to pick another number. Open the triangle that corresponds to that number and read out the task. Your friend or family member will have to respond to the task.
