

MINISTRY OF HEALTH
SINGAPORE

**INFORMATION ON VACCINATION-DIFFERENTIATED SAFE
MANAGEMENT MEASURES (SMMS)**

1. Vaccination-differentiated SMMS for vaccinated individuals have been implemented since 10 August 2021 for selected premises, activities and events. Please refer to [MOH's 6 August 2021 Press Release](#) and [MOH's PET website](#) for activities and events where vaccination-differentiated SMMS are required. From 13 October 2021, vaccination-differentiated SMMS will be expanded to more settings and activities, including in all Libraries under the National Library Board (NLB), and selected activities in community clubs/centres under People's Association (PA). Please refer to [MOH's 20 November 2021 Press Release](#) for more information. Please refer to the list of settings with vaccination-differentiated SMMS required in **Annex A**.
2. Vaccination-differentiated SMMS enable higher-risk activities to resume in a safe manner as we progressively open our economy and community. We have eased measures for those who are fully vaccinated because they have good protection against the infection and are at lower risk of becoming dangerously ill if infected with COVID-19. On the other hand, unvaccinated individuals will need to be more prudent in interacting with larger groups of people especially in mask-off settings, which are higher risk. Hence stricter measures are applied for them.
3. Where vaccination-differentiated SMMS are required, event organisers and relevant enterprises must implement processes to carry out the necessary verification checks on the eligibility status of individual event attendees and customers, in addition to existing safe management requirements.
4. **The following categories of individuals are allowed to enter premises or participate in activities where vaccination-differentiated SMMS are required:**
 - a. Fully vaccinated, i.e. has received the appropriate regimen of World Health Organisation Emergency Use Listing (WHO EUL) vaccines (e.g. Pfizer-BioNTech/Comirnaty, Moderna, AstraZeneca-SKBio, Serum Institute of India, Janssen, Sinopharm, Sinovac-CoronaVac and Covaxin) including their respective duration post-vaccination for the vaccine to be fully effective (please refer to summary in **Annex B**), and had their vaccination records ingested in MOH's national IT systems; or
 - b. Recovered from COVID-19, i.e. less than 270 days of first positive Polymerase Chain Reaction (PCR) test result obtained in Singapore; or

- c. Registered at an [MOH-approved COVID-19 Test Provider](#) to take a COVID-19 ART or PCR test no earlier than 24 hours before the expected end of the stipulated activity and obtained a valid negative result. For example:

- d. Children who are 12 years old and below, i.e. born in or after the year 2009, who are unvaccinated, are also eligible for vaccination-differentiated SMMs and may be included in a group of up to 5 persons for higher-risk activities, including large-scale events as long as all these children are from the same household. For large-scale events, the total number of children is capped at 20% of the actual event size. Please refer to Section 2 of <https://go.gov.sg/pet> for further details.
- e. From 1 December 2021, individuals who are certified to be medically ineligible for all vaccines under the National Vaccination Programme that currently include Pfizer-BioNTech/Comirnaty, Moderna and Sinovac-CoronaVac COVID-19 vaccines will be eligible for vaccination-differentiated SMMs. To be certified as medically ineligible, individuals may, from 15 November 2021, visit a doctor familiar with their medical condition, or alternatively, any clinic or hospital to obtain a hardcopy doctor-certified memo. Please refer to **Section D of Annex C** for the sample of the standard memo. The information would also be subsequently keyed into MOH's Health IT systems so that their entry can eventually be enabled by the TraceTogether/Safe Entry check-in systems at vaccination-differentiated SMMs premises or activities.
5. Event organisers and relevant enterprises must ensure that individuals who do not fall into categories 4a, 4b, 4d or 4e undergo a pre-event test (PET) by MOH-approved COVID-19 test providers and obtain a negative Polymerase Chain Reaction (PCR) test or Antigen Rapid Test (ART) result. Results from self-administered ART supervised by employer or self-administered ART that are unsupervised are not recognised for vaccination-differentiated SMMs. Please refer to <https://go.gov.sg/swabproviders> for the list of MOH-approved COVID-19 test providers.
- a. [NEW] From 1 January 2022, the concession for unvaccinated individuals to perform a pre-event test (PET) in lieu of being fully vaccinated will be removed. Hence, only fully vaccinated, recovered, or medically ineligible individuals, or children 12 years and under (subject to venue/event-specific caps) will be allowed to enter settings and participate in activities where vaccination-differentiated SMMs are implemented. This will be effected on 1 January 2022, to allow time for more individuals to complete their primary series vaccination regime.

6. Individuals who deliberately misrepresent their eligibility status and/or that of others (e.g. including but not limited to the provision of false or misleading verification documents and/or information) may be subject to enforcement action under the Penal Code, Infectious Diseases Act and/or other COVID-19 legislation.
7. Where vaccination-differentiated SMMs are required, event organisers and relevant enterprises must ensure that attendees and customers meet the eligibility requirements stated in para 4 to 6 above. Please refer to **Annex C** for more details on the modes of verification for vaccination-differentiated SMMs.
8. Event organisers or relevant enterprises that are required to implement vaccination-differentiated SMMs should refer to **Annex D** for processes to be implemented. **The use of the SafeEntry (Business) App is strongly encouraged to facilitate eligibility checks for both TraceTogether App and Token users. The SafeEntry Gateway Box cannot be used to facilitate these checks.** For more information on using SafeEntry (Business) App for vaccination-differentiated checks, please refer to <https://go.gov.sg/status-check>.

Annex A – List Settings with Vaccination-Differentiated SMMs

Annex B – Eligibility for Vaccination-Differentiated SMMs

Annex C – Modes of Verification for Vaccination-Differentiated SMMs

Annex D – Processes to be implemented by event organisers and relevant enterprises introducing Vaccination-Differentiated SMMs

MINISTRY OF HEALTH
UPDATED ON: 25 NOVEMBER 2021

List of Settings with Vaccination-Differentiated SMMs

Higher-risk/ mask-off activities
Dining-in at F&B establishments including hawker centres and coffee shops
Mask-off personal care services (e.g. facials and saunas)
High-intensity/ mask-off sports/ exercise activities and classes
Mask-off arts classes (e.g. classes involving singing and wind instruments)
Venues and large events*
Attractions (including museums)
Cinemas
Congregational and worship services
Live performances
MICE events
Shopping malls and large standalone stores
Solemnisations and wedding receptions
Spectator and participatory sports events
[From 1 December 2021] All Libraries under the National Library Board (NLB)
[From 1 December 2021] Selected activities in community clubs/centres under People's Association (PA)

*VDS is generally required for events with more than 50 attendees. However, VDS is required for wedding receptions regardless of event size.

Eligibility for Vaccination-Differentiated SMMs

Please refer to the [First Schedule of the Infectious Diseases \(Mass Gathering Testing for Coronavirus Disease 2019 Regulations 2021\)](#) for the most updated information on prevailing vaccination regimens and approved vaccines recognised for eligibility for vaccination-differentiated SMMs.

The table below shows the vaccination requirements as of 25 Nov 2021.

Manufacturer	Name of Vaccine	Doses	Recommended (and Minimum) Interval between doses	Interval from Completion of Vaccine Course to Fully Vaccinated Validity
Tozinameran (Pfizer-BioNTech COVID-19 vaccine or Comirnaty COVID-19 vaccine)	BNT162b2/COMIRNATY Tozinameran (INN)	2 doses	21 (17) days	14 days
Moderna COVID-19 vaccine	mRNA-1273	2 doses	28 (24) days	14 days
Vaxzevria (AstraZeneca COVID-19 vaccine)	AZD1222-Vaxzevria (ChAdOx1_nCoV-19)	2 doses	28 (24) days	14 days
Covishield COVID-19 Vaccine (Serum Institute of India)	Covishield (ChAdOx1_nCoV-19)	2 doses		14 days
Johnson & Johnson's (J&J) Janssen COVID-19 vaccine	Ad26.COV2.S	1 dose	NA	14 days
Sinopharm COVID-19 Vaccine*	SARS-CoV-2 Vaccine (VeroCell), Inactivated (InCoV)	2 doses*	21 (17) days	14 days*
Sinovac-Coronavac COVID-19 vaccine*	COVID-19 Vaccine (Vero Cell), Inactivated/Coronavac™	2 doses*	28 (13) days	14 days*
Covaxin	Bharat Biotech BBV152 COVAXIN®	2 doses	28 (24) days	14 days

EXCEPTIONS				
Category of Individuals	Name of Vaccine	Doses	Recommended (and Minimum) Interval between 2 doses	Interval from Completion of Vaccine Course to Fully Vaccinated Validity
Mixed vaccine regimens in COVID-19 naïve persons	Any WHO EUL vaccine (mixed): <ul style="list-style-type: none"> • BNT162b2/COMIRNATY Tozinameran (INN) • mRNA-1273 • AZD1222-Vaxzeveria (ChAdOx1_nCoV-19) • Covishield (ChAdOx1_nCoV-19) • Ad26.COV2.S • SARS-CoV-2 Vaccine (VeroCell), Inactivated (InCoV)* • COVID-19 Vaccine (Vero Cell), Inactivated/Coronavac™* • Bharat Biotech BBV152 COVAXIN® 	2 doses (mixed)	At least 17 days	14 days
COVID-19 Recovered Persons who have not completed vaccination previously		1 dose 90 days (min. 28) from date of first positive PCR, OR In the absence of a positive PCR test, any time after a positive serology test attributable to infection		

***NOTE: From 1 Jan 2022, Sinopharm and Sinovac-Coronavac vaccines will require three doses to be considered fully vaccinated:**

- Persons with two doses will be considered vaccinated for a period of four months after 14 days of completing the two doses. The third dose needs to be completed from 90 days onwards for a person to be considered fully vaccinated.
- For persons who take the Sinopharm or Sinovac-Coronavac as part of a mixed primary vaccination series, at least three vaccine doses are required, including if the first or second vaccine were other WHO-EUL vaccines
- For recovered persons who had not completed a vaccination regimen, those vaccinating with the Sinovac-Coronavac or Sinopharm vaccine after recovery would require two vaccine doses.

Modes of Verification for Vaccination-Differentiated SMMs

The full list of acceptable documents can be found at <https://go.gov.sg/acceptabledocs>. For more information on vaccination statuses and records, please visit <https://go.gov.sg/postvacc>.

An individual is eligible if:	Modes of verification (recommended in bold)
A. An individual is fully vaccinated	
Vaccinated in Singapore	<ol style="list-style-type: none"> TT app or TT token to be scanned against the SE (Business) app TT app HealthHub Local physical vaccination card & government-issued photo identification card
Vaccinated overseas with full regimen of WHO EUL vaccines and do not have their vaccination records ingested in MOH's national IT systems	<ol style="list-style-type: none"> TT app or TT token to be scanned against the SE (Business) app TT app
Vaccinated overseas with full regimen of WHO EUL vaccines and had their vaccination records ingested in MOH's national IT systems ¹	<ol style="list-style-type: none"> TT app or TT token to be scanned against the SE (Business) app TT app HealthHub app
Recovered from COVID-19 in Singapore and subsequently received 1 dose of WHO EUL vaccine in Singapore	<ol style="list-style-type: none"> TT app or TT token to be scanned against the SE (Business) app TT app HealthHub app Local physical vaccination card & government-issued photo identification card <p>In the event that the recovered individual's test result status is "not cleared", the individual is to produce either one of the following with their government-issued photo identification card:</p> <ol style="list-style-type: none"> PET exemption notice²; or Discharge memo if it indicates the date of the 1st PCR positive result or PET exemption period
B. An individual has recovered from COVID-19 in Singapore	
Recovered from COVID-19 with first positive PCR test result within 270 days	<ol style="list-style-type: none"> TT app or TT token to be scanned against the SE (Business) app TT app <p>In the event that the recovered individual's test result status is "not cleared" or he/she is unvaccinated and his test result status is "no</p>

¹ SC/PR/LTPHs who are vaccinated overseas must first be tested serology positive at a medical provider before their vaccination records are recognised by MOH. SE (Business) App and TT App will only be able to display their vaccination status after the clinic has provided the data to National Immunisation Registry (NIR). Beyond 30 days, STPH are recommended to undergo a serology test in order for the vaccination status to continue to be recognised and shown as "Vaccinated" on SE (Business) App and TT Apps. More details on the process, including the list of the approved providers, can be found on [MOH's Post Vaccination Matters website](#).

² The PET Exemption Notice can be obtained from [any MOH approved provider offering ART or PCR testing services](#). Please note that this applies to only COVID-19 infections in Singapore.

	test result”, the individual should produce either one of the following with their government-issued photo identification card: <ol style="list-style-type: none"> 1. PET exemption notice; or 2. Discharge memo if it indicates the date of the 1st PCR positive result
C. An individual who is not fully vaccinated	
Has valid negative COVID-19 ART ³ or PCR result from an MOH-approved COVID-19 test provider within 24 hours, covering the duration of the stipulated activity	<u>SC/PR/ LTPHs⁴</u> <ol style="list-style-type: none"> 1. TT app or TT token to be scanned against the SE (Business) app 2. TT app 3. HealthHub <u>STVPs</u> <ol style="list-style-type: none"> 1. Hardcopies of the following along with their government-issued photo identification card: <ol style="list-style-type: none"> a. Patient Risk Profile Portal (PRPP) ART result slip; or b. COVID-19 Test Result Notice (ART); or c. COVID-19 Test Result Notice (PCR).
D. Others	
Child aged 12 years and below (i.e. born in or after the year 2009)	Proof of identity for children ≥ 7 years old (e.g. student concession card)
[FROM 1 DEC] Individuals who are medically ineligible for vaccines under the National Vaccination Programme	<ol style="list-style-type: none"> 1. Hardcopy of the doctor-certified memo⁵ along with their government-issued photo identification card (for STVPs and individuals whose information have not been reflected in their TT app and HealthHub. (see Figure 1 for sample of the standard memo) From early December 2021, when the TraceTogether/Safe Entry check-in systems are ready to display medical ineligibility information: <ol style="list-style-type: none"> 2. TT app or TT token to be scanned against the SE (Business) app 3. TT app 4. HealthHub

³ Negative results obtained from self-administered ART test and self-administered ART test performed under supervision by parties other than MOH-approved COVID-19 test providers are not eligible for vaccination-differentiated SMMs. Individuals with negative ART test taken at Quick Test Centres (QTCs) are eligible for vaccination-differentiated SMMs if the negative test was taken in the last 24 hours and covers the duration of the event, business or activity.

⁴ SC/PR/LTPHs can check the validity period of their “cleared” test result using the latest version of the TraceTogether App. Please visit the [TraceTogether website](#) for more information on the COVID Health Status.

⁵ Refer to para 4(e)

 MINISTRY OF HEALTH SINGAPORE	
CERTIFICATION OF MEDICAL INELIGIBILITY FOR ALL COVID-19 VACCINES UNDER THE NATIONAL VACCINATION PROGRAMME	
Full Name (as per NRIC/FIN/Passport):	<input type="text"/>
NRIC/FIN/Passport Number:	<input type="text"/>
Contact Number	<input type="text"/>
To whom it may concern,	
This is to certify that the above-mentioned person is medically ineligible for all COVID-19 vaccines under the National Vaccination Programme (NVP) because he/she is a: (Please tick where appropriate)	
<input type="checkbox"/> Person <u>aged 18 years (based on date of birth) and above</u> who was unable to complete the vaccination regime due to previous severe adverse reactions or allergies to all NVP vaccines, that currently includes both of the following (1) any mRNA COVID-19 vaccines and (2) Sinovac-CoronaVac COVID-19 vaccine; or	
<input type="checkbox"/> Person <u>12 to 17 years of age</u> who was unable to complete the vaccination regime due to a previous severe adverse reaction or allergy to a previous dose of a mRNA COVID-19 vaccine; or	
<input type="checkbox"/> Person with/ under the following condition(s)/ treatment: <input type="checkbox"/> Transplant within past 3 months; and/or <input type="checkbox"/> Aggressive immunotherapy; and/or <input type="checkbox"/> Active cancer on treatment. Please indicate the date when the above criteria will cease (where applicable): _____	
Additional comments: <input type="text"/>	
Thank you.	
Stamp/ Signature/ Date: <input type="text"/>	
Name and MCR No of Certifying Medical Practitioner:	<input type="text"/>
Clinic/ Hospital Name:	<input type="text"/>
Contact Number:	<input type="text"/>

**Processes to be Implemented by Event Organisers and Relevant Enterprises
Implementing Vaccination-differentiated SMMs**

1. Event organisers and relevant enterprises must verify that an individual fulfils the eligibility requirements before allowing him/her to enjoy vaccination-differentiated SMMs (e.g. entry into and attendance of event or dining in at food and beverage establishments where vaccination-differentiated SMMs are required).
2. Checks by event organisers and relevant enterprises should be limited to the verification of the individual's eligibility status for vaccination-differentiated SMMs, and the information shared by event attendees or customers should not be used or stored for other purposes.
3. Event organisers and relevant enterprises that implement vaccination-differentiated SMMs should put up clear signages to inform event attendees and customers on this and verify their eligibility status. They are encouraged to inform individuals of the documents they will need to provide ahead of their visit where possible.

Diagram 1. Flowchart summarising the process by which event organisers and relevant enterprises can check if an individual is eligible for Vaccination-differentiated SMMs.

* When checking in via SafeEntry (Business) App, a "Check in recorded" screen in green is shown if the individual is eligible for VDS. (Note: only for venues that have enabled VDS Check with Auto Check-ins switched on)

Using SafeEntry (Business) App

- Event organisers and relevant enterprises that have deployed the SafeEntry (Business) App to facilitate check-ins should ensure that the app has been updated to the latest version. The vaccination-differentiated SMMs check-ins should be enabled for the venue via the SafeEntry (Business) dashboard, before they are able to verify vaccination status and test result⁶. The auto check-in function is switched on by default to facilitate faster check-ins for individuals who are eligible for vaccination-differentiated SMMs. Event organisers and relevant enterprises should switch off auto check-ins if there is a need to visually verify visitors' vaccination status or test result or test validity period.
- The SafeEntry (Business) App check-in process also provides the last four alphanumeric characters of the person's NRIC/FIN which can help authenticate the identity of the individual checking-in to the event or activity. The eligibility criteria, illustrated using the SafeEntry (Business) App icons, can be found in Diagram 2 below.

Diagram 2: Eligibility for Vaccination-differentiated SMMs

(This diagram will be updated again in the near future when the TraceTogether/Safe Entry check-in systems are enabled to recognise individuals' medical ineligibility information.)

Vaccination Status	Test Status	Eligibility for Vaccination-Differentiated SMMs
	 	
		
		
 		 Unless PET Exemption Notice/ Discharge Memo presented

⁶ Please see the user guide at <https://go.gov.sg/status-check> for step-by-step instructions.

6. The event organisers and relevant enterprises may use (i) the Scan Token QR mode within the SafeEntry (Business) App or (ii) 2D scanner connected to a PC/laptop to scan the TraceTogether Token's QR code. In extenuating circumstances, NRIC/FIN can also be scanned at the discretion of the business. Individuals should be reminded to replace Tokens that are faulty or out of battery.

Using other modes for eligibility checks

7. Event organisers and relevant enterprises may ask individuals to show their vaccination status or test status on their TraceTogether or HealthHub App. Event organisers and relevant enterprises should ensure that the individual is not displaying a screenshot by requesting individuals to click on other icons or "refresh" button within the app. Event organisers and relevant enterprises must ensure that individuals who show their vaccination status via the TraceTogether app have completed SafeEntry check-in.
8. Please refer to the full list of acceptable documents [here](#).
9. Event organisers and relevant enterprises must not recognise any other documents, copies, or any other variations in format and should verify that acceptable documents provided for entry (e.g. physical test result notices, PET Exemption Memo, etc.) belongs to the individual, i.e. NRIC/FIN on the document matches the NRIC/FIN on the government-issued photo identification card. Hardcopy overseas vaccination certificates will not be accepted for vaccination-differentiated SMMs.
