

Video Conferencing in SLS

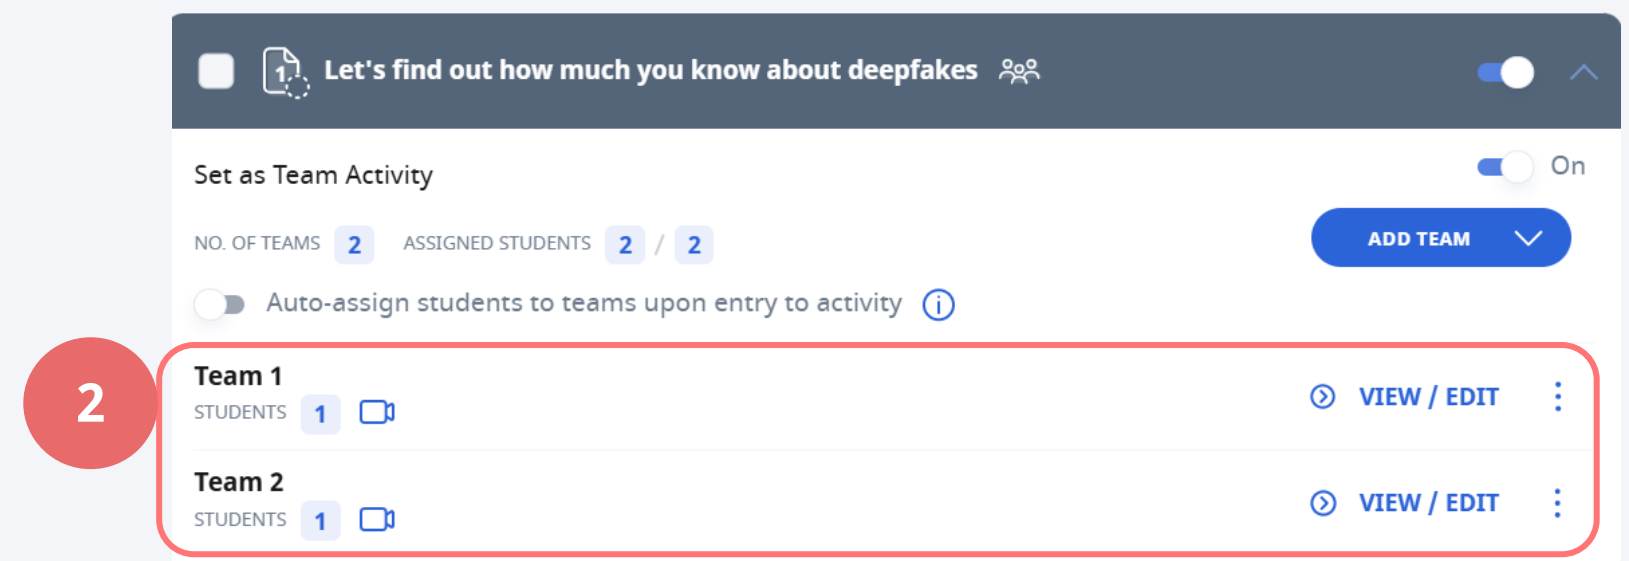

How can I set up breakout rooms to facilitate small group discussion as part of a collaborative or differentiated lesson?

Teachers can create and embed Google Meet links for their class groups in SLS, including unique links for each activity or subgroup. Students can even be directed to their respective breakout rooms without needing instructions from teachers

Teachers can create unique Google Meet links for each activity.

Teachers can also assign unique Google Meet links for selected teams or subgroups.

How can my students catch up on their learning when they missed lessons?

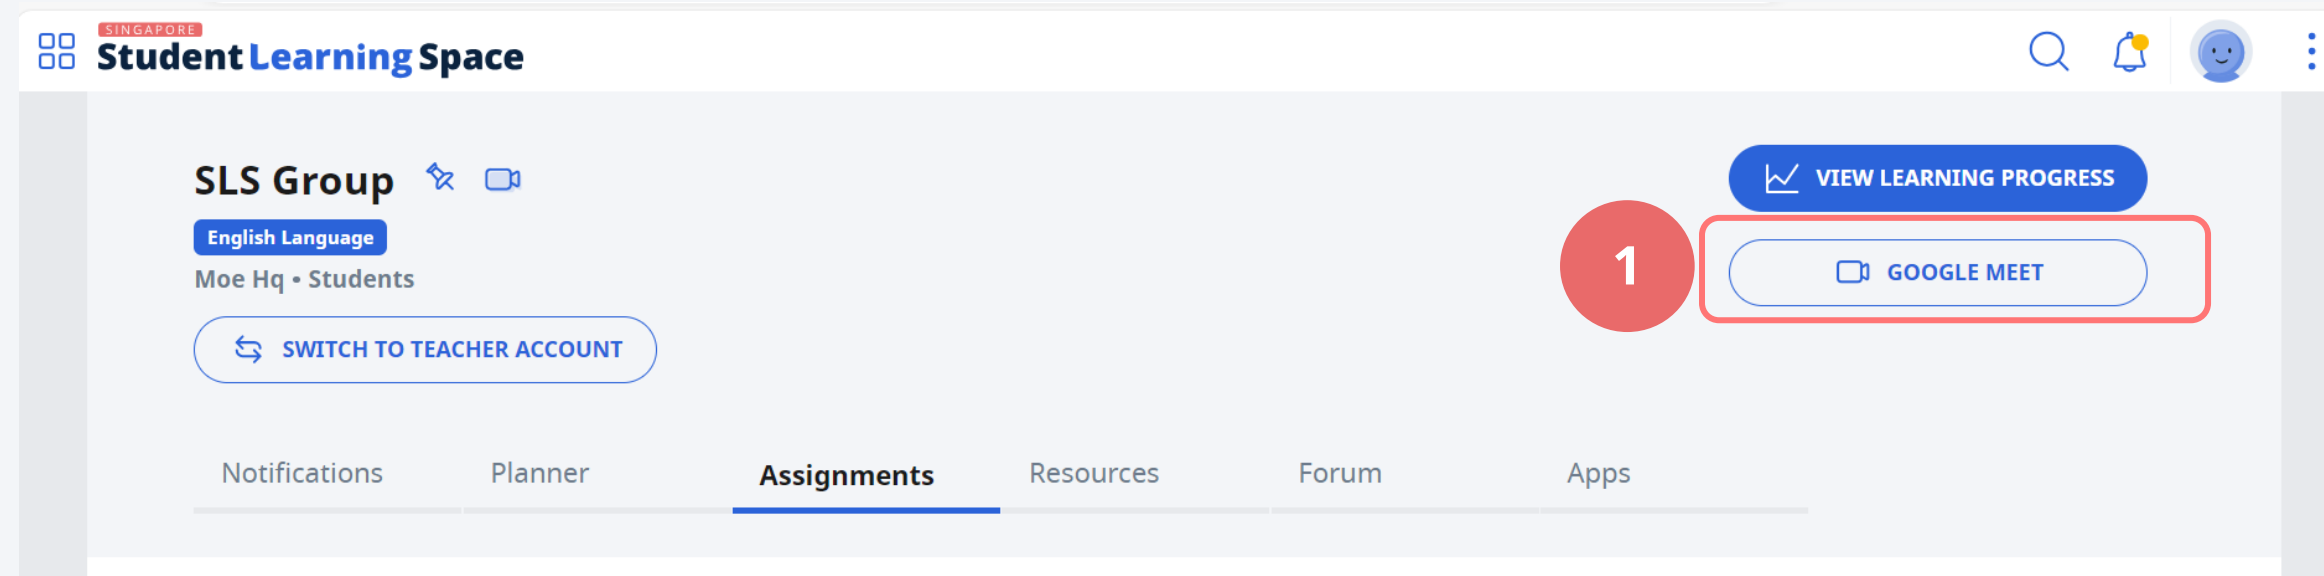

Google Meet in SLS can help teachers to address this concern by enabling teachers to record their lessons, post the lessons in the SLS module, such that students can access the recording to either catch up on what they had missed or to revisit the lesson to reinforce their understanding.

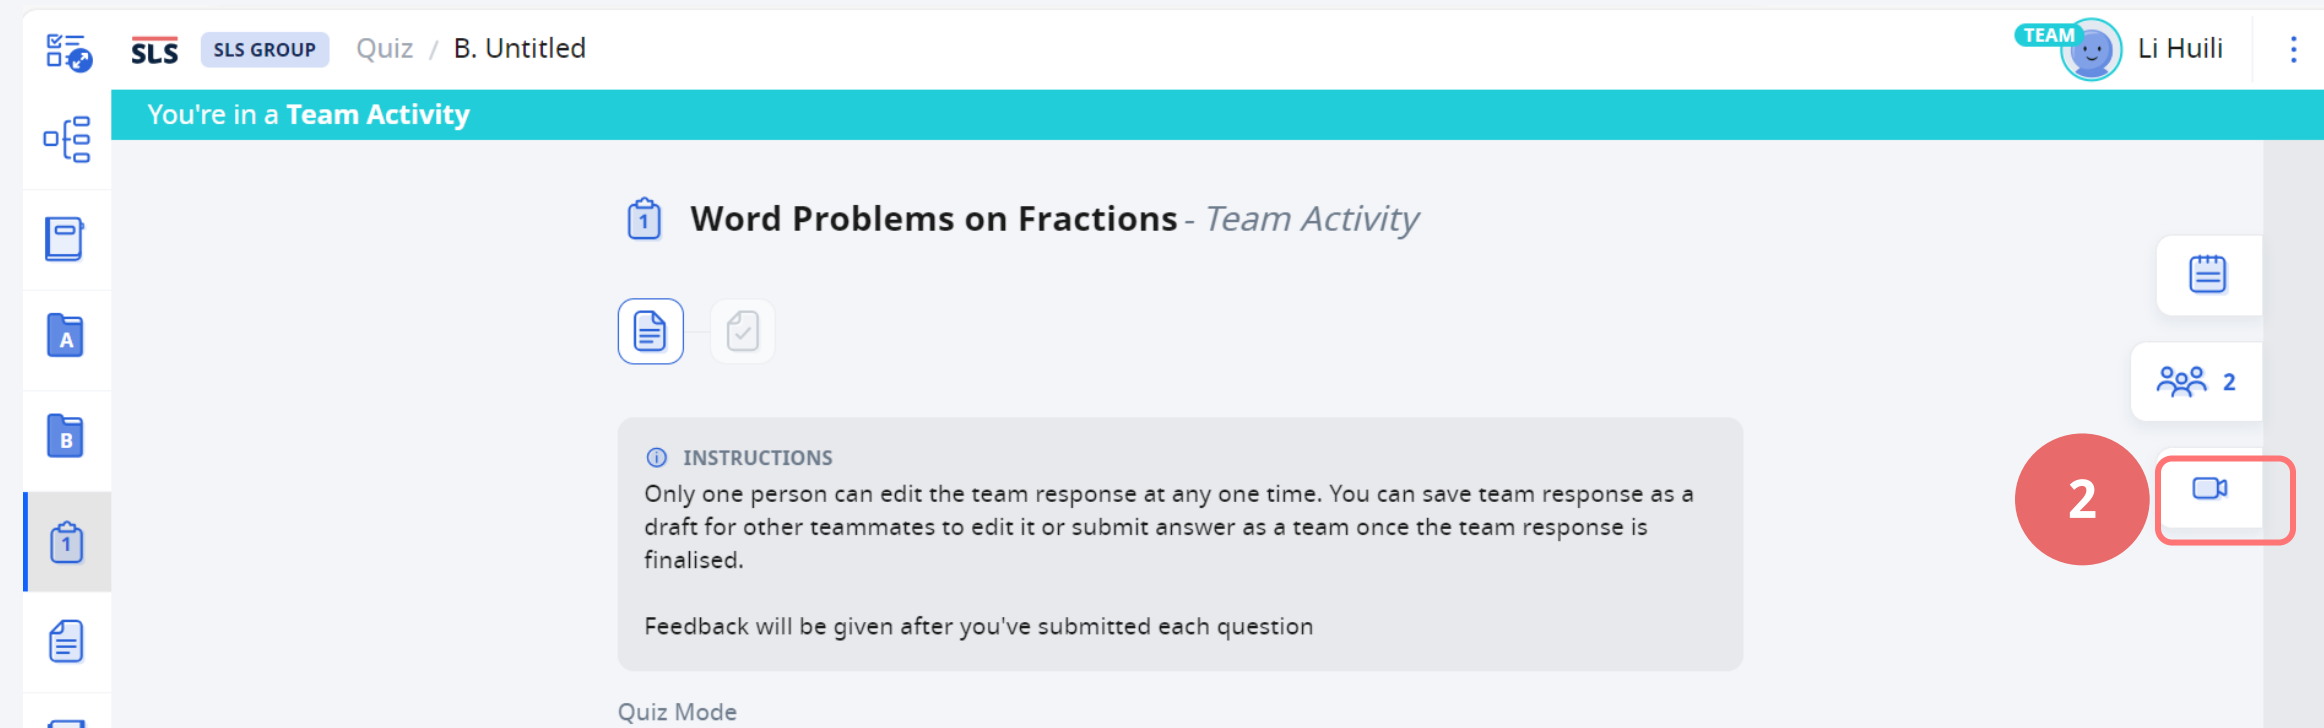

Refer to this ePoster at <https://go.gov.sg/googlemeetvcintegration> to learn how to record a lesson using Google Meet and upload the video to SLS with transcription.
